

Day 02

Furniture E-Commerce Website

We are creating a furniture website to sell a sofas, table, chair etc for a fast and mobile friendly design through "next js" and "Sanity CMS" to manage all types of furniture, sofas, chairs, orders and customer information

① Main Features

① Front End:- (Next js):-

Fast and works well on photos,
key pages: Home, Categories, Product Listing
Cart, Checkout and Order Tracking.

② Backend:- (Sanity CMS:-)

Easily manage furniture details all types of chairs, table, etc. price, size, color and customer information.

Easy to update product details and stock

* Track delivery Status

* Safe payment option for secure buying

* This plan will make shopping for sofas simple and easy.
